Professional Experience

Valores Humanos

I worked collaboratively within a team environment, where effective communication was paramount. My role primarily involved designing and implementing various psychological tests aimed at evaluating candidates for recruitment purposes. Working within the framework established by the company, I adhered to strict guidelines and protocols to ensure the integrity and confidentiality of the assessment process. My ability to communicate effectively within the team facilitated seamless coordination and alignment of objectives, ultimately contributing to the successful execution of our recruitment initiatives.

ASTCO Trading | Americas Shanghai Trading Co.

As an independent professional, I spent a year collaborating with exterior commerce businesses, focusing on technical solutions. This included developing a customized landing page, handling language localization challenges like transitioning to Chinese, and integrating a seamless contact form. Throughout the project, I provided ongoing technical support, ensuring the smooth operation of their digital presence.

AI Click | Ecommerce

I spearheaded the development of a sophisticated software toolset tailored for a specific team. This tool, integrated with Python and a database system, automates pricing strategies by mapping product data from Excel files and calculating selling prices based on desired profit margins for different markets.

It features secure login capabilities for authorized personnel to adjust market commissions and manage user permissions. Upon pricing completion, users can download updated product data in Excel format, facilitating streamlined operations and enhancing market competitiveness for AIClick.

Piedra Naranja

During my tenure at Piedra Naranja, a company specializing in cabin rentals in the scenic mountains, I undertook the development of a website using WordPress. This project involved creating a user-friendly platform to showcase the company's offerings and facilitate bookings for their charming cabins nestled in the hills. Through effective utilization of WordPress's capabilities, I successfully delivered a visually appealing and functional website that enhanced the company's online presence and streamlined their booking process.

Education Background

- **Colegio San Juan El Precursor** | San Isidro | 2021
- **Web Developer** | Coder House | 2020
- **JavaScript** | Coder House | 2020
- **REACT.js** | Coder House | 2021

Achievements

English level C2

- Cambridge PET | Approved
- Cambridge FCE | Approved
- Cambridge CAE | Approved

Skills

Web Development

- JavaScript (ES6+)
- React (including functional components, hooks, context API, etc.)
- Framer Motion (for animations in React)
- WordPress (theme and plugin development and customization)

Data Handling and Connectivity

- Fetch API (for making asynchronous HTTP requests)
- Axios (for handling HTTP requests in both browser and Node.js environments)
- RESTful API integration
- GraphQL (for querying and manipulating data from servers)
- SQLite (for relational database management)
- Node.js (for server-side JavaScript development)
- Firebase (utilizing Firestore for real-time NoSQL databases)

Others

- Full-stack development experience.
- Proficiency in version control tools like Git.
- Basic knowledge of HTML and CSS for web development.
- Experience implementing authentication and authorization systems in web applications.
- Ability to work in teams and communicate effectively with different departments and clients.
